SUMMARY

Frontend Engineer with 4+ years of experience building scalable web applications using React, Next.js, and TypeScript. Experienced in UI/UX implementation, responsive design, and modern frontend architectures. Passionate about creating high-performance interfaces and collaborating with cross-functional teams to deliver reliable software products

EXPERIENCE

Senior Software Engineer

Codimite (PVT) Ltd

Mar 2022 - Present

- Contribute to developing the Prodoscore dashboard frontend using Next.js while gaining experience with frontend best practises and working with backend developers.
- Contributed to the backend development of the Prodoscore dashboard using Python, leveraging AI tools to rapidly build complex features and successfully executing multiple architectural revamps to optimize system performance and scalability.
- Contribute to developing the Apollo NFT dashboard using Next.js and collaborate with backend developers.
- Contribute to developing Apollo.art website using Next.js.
- Develop an ID server frontend to manage Apollo.art users using GOHTML and JavaScript.
- Develop EggBurn.xyz using React.js NFT website (UI/UX design and web app development).
- Gave guidance to junior developers.

Software Engineer

Codimite (PVT) Ltd

Associate Software Engineer

Codimite (PVT) Ltd

Trainee Software Engineer

Codimite (PVT) Ltd

Frontend developer

Logistics blocks Limited c/o

Jun 2021 - Mar 2022

- Develop the LogisticsBlocks.com company website using react.js
- UI/UX designing and other relevant designs

SKILLS

TECHNICAL SKILLS

Next.js React.js TypeScript JavaScript Tailwind CSS Material UI HTML CSS SCSS Node.js PHP Python MySQL MongoDB Git version control Github copilot Opencode Cloadcode UIUX design Graphic design Figma Adobe XD Photoshop illustrator Agile jira tools

SOFT SKILLS

Good communication Team work Creativity Leadership Team player Goal oriented Problem solving Following best practices

PROJECTS

Prodoscore - Next.js + Django

https://app.prodoscore.com

Prodoscore is an employee productivity monitoring software designed for modern workplaces, especially remote and hybrid teams

- Architected and developed scalable, high-performance frontend features using Next.js and modern UI frameworks, collaborating within an Agile team to seamlessly integrate complex backend APIs.
- Contributed to the backend development of the Prodoscore dashboard using Python/Django, leveraging AI tools to rapidly build complex features and successfully executing multiple architectural revamps to optimize system performance and scalability.

EXPERIENCE

Internship

Kyrax Solutions (PVT) LTD

Nov 2020 - Jun 2021

- Gain experience in full-stack development with PHP, MySQL, javascript and wordpress development

EDUCATION

BEng (Hons) Software Engineering

ESOFT Metro Campus, Colombo

HND in Software Engineering

ESOFT Metro Campus, Ratnapura

LANGUAGES

English
Intermediate

Sinhala
Native

PROJECTS

Apollo NFT dashboard - Next.js

Apollo NFT dashboard is a platform to manage users and their NFTs, and create playlists

- Front-end development was done in collaboration with other developers. Create UI/UX designs using Figma

Apollo.art - Next.js

https://apollo.art
Apollo.art is a company website designed to market and showcase its art galleries and featured artists, and to promote its mobile and TV applications

- Contribute to implement website by collaborating with other developers

Apollo ID server - GOHTML and JavaScript

Apollo ID server is a Dashboard for managing users of Apollo platforms (users in Mobile app and NFT website)

- Create UI/UX design and develop the dashboard

Apollo Art Tv App - web os (LG tvs), tizen os (samsung TVs)

Playlists that create from mobile app can be instantly displayed on any smart-enabled TV in your home or office, transforming any room into a digital gallery

- Did the initial research about webos and Tizen OS integration and develop TV app for both operating systems

EggBurn.xyz - React.js

https://eggburn.xyz
EggBurn.xyz is a Web3 platform for the Chikn NFT community where users can connect their wallet to burn egg tokens and earn rewards

- Created UI/UX mockups and did the initial development of the frontend

Logisticsblocks.com - React.js

LogisticsBlocks is a blockchain platform that improves and manages supply chain operations for businesses

- Created UI/UX mockups and the company website
